First Name	Last Name	Email Address

Audience Import Wizard

Import Audience Members

You have selected a text file import profile (ASCII). These settings allow you to specify the record format of the file.

Record Layout

Tab Delimited

Comma Delimited

Field Separator:

Field Delimiter:

Record Separator

Carriage Return

Line Feed

Both

Record Header
Check this if the first line in the ASCII file is a list of field names to identify the values in each field.

Below is an example of an ASCII file with a quotation-mark ("") as the Field Delimiter, and a comma (,) as the Field Separator:
"ABC Company","1111 First Drive","Anytown"
